A.S. IN CONSTRUCTION MANAGEMENT

Today's construction industry utilizes construction management best practices to oversee, manage and control the scope, schedule, budget, quality, safety and risk during all stages of its projects lifecycle (planning, design, pre-construction, construction and closeout). Successful completion of construction management courses prepares students for construction management entry-level opportunities in one of many functions and/or postilions that support the construction project management team. For students who already have prior construction industry experience, this program will prepare them for potential promotional opportunities.
