Catalog Course Description

The course explores global perspectives on major issues and examines social, political and environmental movements and solutions to conflict. The course looks deeper into global culture, use of energy, changing cultural values and the struggle for equality or political stability and what progress and solutions have been made into the issues. Themes will include social justice, poverty, climate change, migration, depletion of fresh water, terrorism, capitalism and international trade. 54 lecture hours.

Course Objectives

- Synthesize world issues of cultural, political, economic and environmental importance
- Analyze historic and current demographic, social and cultural changes in migration, inequality, environmental sustainability, war and cultural identity.
- Examine solutions to global issues and the progress made in resolving them. Investigate whether regional culture has made an impact on the issue, and whether local cultures are negatively affected by the issue.
- Evaluate the role that activism plays in resolving world issues. Decide if the role that activism plays in developed countries differs from the role that activism plays in underdeveloped countries for social and environmental issues.
- Critically assess the arguments of proponents and critics of globalization and draw on relevant readings to support their arguments.
- Apply historical and analytical knowledge to specific areas of the global economy and write on the nature of international trade, economic crises, financial liberalization, neoliberalism, global division of labor, international economic development, gender and globalization, security and the environment.

Examples of Required Writing Assignments

You will write an essay addressing the following: Choose a Social, Political, Environmental, Equality, Poverty or Human Rights issue to have your fictional organization work to solve.

- Include a thesis statement: Stating the global issue and how the organizations/social movements involved in your research is actually solving it.

Paragraph 1- Describe what type of Social Movement/organization: Is it addressing a Deprivation in Society? Is it Resource Mobilization? Is it Mass Movement? Does it represent the concepts of Globalization? Does it practice non-violence?

Paragraph 2- Propose your research plan, stating the issue, the organization(s) currently solving the problem and their methods

Paragraph 3- Propose a theoretical model with which to approach the problem/solution. Contact the organizations media representative for more info on mission statements or goals for the organization that may have a model of how they work.

Paragraph 4- Propose field research, what is unknown about the issue, what needs to be understood better

Paragraph 5- Investigate sources of funding, compile an estimated budget, and describe how the funds will be used to carry out your task

Examples of Outside Assignments

Demographic Data Collection and Analysis Purpose: students will look up demographic data for a variety of countries to become more familiar with demographic measures.

- Students choose 6 to 10 countries for analysis. - Data selection: Research Census data. Assemble the data in a table. 10 points - Analysis: Write a reflection on what you learned. 20 points

Sample:

Use the following countries in your analysis: Afghanistan Bolivia Cambodia China France Lithuania Tanzania Turkey United States Look up the following information for each country on www.prb.org and assemble it into a table. Your table should be easy to read and fit onto one page. If you cannot fit it onto one page, please make sure that all column and row labels are present on the second page.

Crude Birth Rate (Births per 1,000 population) Crude Death Rate Rate of Natural Increase Infant Mortality Rate (Infant deaths per 1,000 live births) Life Expectancy GNI PPP per capita . . . and any other data you find personally interesting.

Include a column or row in your table in which you identify which stage of the demographic transition you believe each country to be in.

Once you have assembled your table, write a two- to three-page paper (500 to 750 words) on what you have learned from assembling this information: Do there appear to be any trends or relationships between the data? Are there any data that surprise you?
